

Available in widths over 39', the Arena Electrol® is the solution to your large venue motorized projection screen needs. The Arena Electrol® is designed with a unique built-in balancing system and steel cable guides to ensure smooth, even screen retraction and a flat viewing surface with each use. The housing for the Arena Electrol® features a durable steel inner frame with a black steel case finish and fixed mounting brackets. The Arena Electrol® includes a radio frequency remote control and a three position wall switch. The projection screen surface is centered in the screen housing. Available with Matte White and Perforated Matte White fabric.

Arena Electrol

DA-LITE®

ELECTRIC SCREENS

- Internal steel structure supports roller and fabric assembly. The steel structure is clad with painted black steel casing providing a finished appearance.
- Furnished with mounting brackets that may be attached to the top or back of the case.
- Screen is raised by two steel cables wound on the roller. Built-in balancing system ensures the roller remains perfectly horizontal.
- Available in sizes up to 19'-8" high x 39'-4" wide. Screen is custom made to order in the size desired.
- Includes a radio frequency remote control and a three position wall switch.
- The projection screen surface is centered in the screen housing.
- Available with Matte White and Perforated Matte White fabric, no borders.

Unique built-in balancing system and steel cable guides to ensure smooth, even screen retraction and a flat viewing surface with each use.
